

# How to make CHRISTMAS JULEHJERTER (traditional Danish woven heart baskets)

1. Cut out the template from two different coloured pieces of paper; red and white are the most traditional.
2. Fold each piece in half and make 2 equidistant cuts just up to where the edge of the heart starts to bend.
3. Weave the paper as shown on the diagram; the first strip (3) will go inside A, over B and inside C. The order is reversed for the second strip (2), and then again for the third (1).
4. Cut a piece of paper for the handle and glue on as shown. Fill with sweeties and tiny treats and hang on your Scandi-style tree!
